# Installation instruction

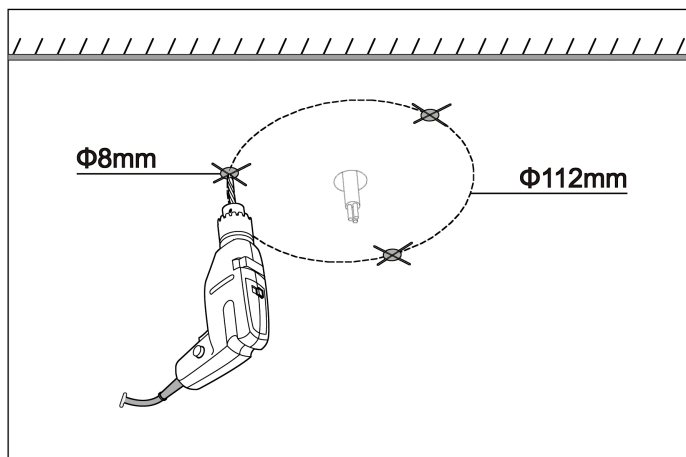

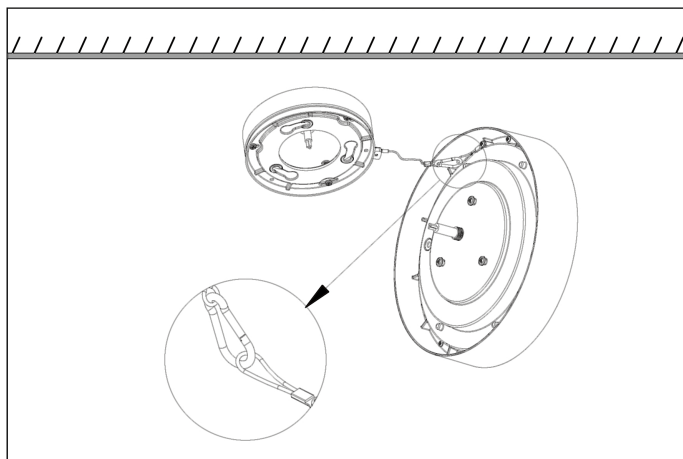

1.Punch three holes (size:Φ8mm*50mm) at the position of three equal parts on a circle (diameter :112mm) in the ceiling.
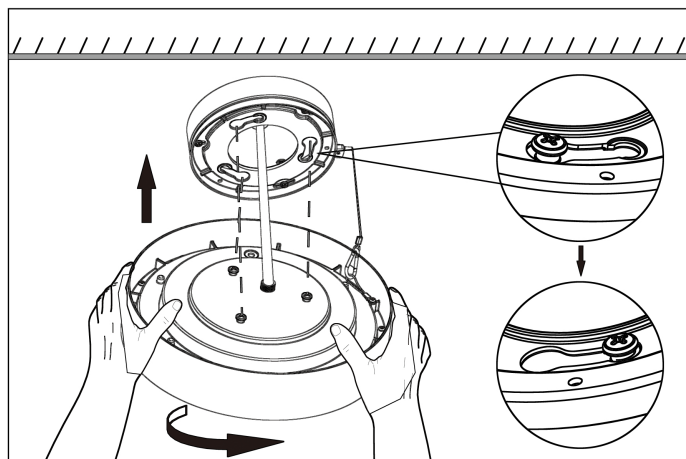

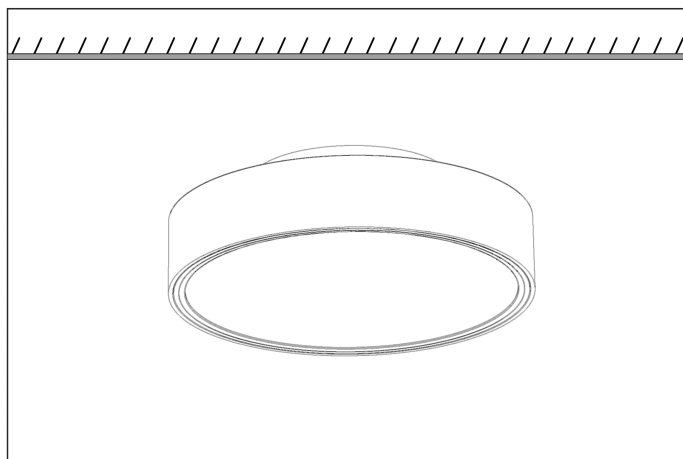

Φ8mm Φ112mm

2.Install the plastic geckos.

3.Fix the base to the ceiling with self-tapping screws.

4.Put the safety rope around the metal clip of the lamp body, then connect the cables (ensure the power is off and input AC 200-240V).

5.Align the hole, and screw the lamp body clockwise into the base (about 30°). If there is a slight looseness, it indicates that it is rotated in place.

Pluxb luminaires are developed with globally recognized and tested components suppliers, however as per international standards tolerance in initial flux and connected load is at ±5%. Unless stated otherwise, the values apply to an ambient temperature of 25°C
