

FLORA RGB DMX

DESCRIPTION:

FLORA RGB DMX Flexible Wall Washer series constructed using Silicon extrusion process. Uniform, dot free light emission, good appearance consistency. Anti-yellowing, high temperature and corrosion resistance, weak acid and alkali resistance UV proof for true outdoor applications. Easy installation with clips and bendable track. Cuttable for Flexible application. Control mode : DMX512.

TECHNICAL DETAILS:

Power : 20W/M
Voltage : DC24V
CRI >90
IC Chips : SM18522PS
Length/Reel : 5M
Cutting length: 166.7mm
Led Qty : 42LEDs/M
Pixels : 6 pixels/M
Working Temperature : -25~55°C
Storage Temperature : -30~80°C
Voltage Range : 23 ~25V dc
Reverse Voltage : 25V dc
Warranty : 5 years

LUMENS PER METER:

OPTICS : 15°/30°/60°/30x45°/25x20°
CCT : RGB
20W : 800lm/W

INSTALLATION : Vertical Bend

Product Code : 7052205

DIMENSION:

LIGHT DISTRIBUTION:

BENDING:

End cap

Standards

EN 60598-1
EN 60598-2-2
EN 60598-3-2

Order Code Ex : 7052205	20	93	15
Product Code 7052205	Power 20-20W	CCT 93-RGB DMX	Beam Angle 15-15°
			30-30°
			60-60°
			30x45°
			25x20°

Pluxb luminaires are developed with globally recognized and tested components suppliers, however as per international standards tolerance in initial flux and connected load is at ±5%. Unless stated otherwise, the values apply to an ambient temperature of 25°C

Protection: IP67 (Mated)

Beam Angle

ADDITIONAL INFO.

- ▶ Please light it up for a quick check before installation.
- ▶ Bending diameter of FLORA RGB DMX 2205 is 150mm for Horizontally
Do not bend too sharp or twist. If bend it wrongly, PCB inside will be damaged and the lighting fixture will not turn on.
- ▶ During installation, please make sure there are at least two workers to cooperate together and strictly follow the instruction manuals.
- ▶ Warranty: All LED light are warranted to be free from defects in product itself for 5 years from the date of purchase. This warranty does not cover failures due to abuse, misuse, improper handling, act of nature, negligence, normal wear, accidental damage, repairs made by the purchaser or incorrect voltage conditions.

Note:

-20W/M Max. 7mtr run length to double side feed.

-The given data are typical values due to the tolerances of the production process and the electrical components, values for light output and electrical power can vary up to 5%.

 White---(A)DMX+
 Blue---(B)DMX-

GENERAL MOUNTING

Installation With back tape

Remove the product from the packaging box and tear off the tape on the back.

Install the product where you need it (ensure the wall is smooth), refer to the installation distance diagram for the specific glowing effect, and stick it firmly.

Connect the product to the low-voltage driver and energize it.

Installation with stainless steel mounting clip

Remove the stainless steel mounting clips and screws from the packing box, and use a screwdriver to install these clips where needed.

Take the light out of the box, then put the light into the clips and secured it (refer to the installation distance diagram for the specific glowing effect).

Connect the product to the low-voltage driver and energize it.

Installation with Silicone Mounting Clip

Place the light where needed, and refer to the installation distance diagram for the specific glowing effect.

Remove the silicone mounting clips and screws from the package box, and fix these clips with a screwdriver.

Connect the product to the low-voltage driver and energize it.

Installation with Aluminum Profile

Remove the light, aluminum profile and rotating brackets from the box, and fix the rotating brackets to the needed position with a screwdriver.

Put the light into the aluminum profile, and press the light down along the profile to ensure the light is tightly stuck into it. Then fasten the profile on the rotating brackets (according to the glowing angle requirements, the rotating bracket can be adjusted).

The specific glowing effect can be adjusted according to the needs of the application. After the installation, connect the light to the low-voltage driver and energize it.

INSTALL

Attention

1. Correct bending way

Correct operation

During the installation process, the LED wall washer is taken out from the reel naturally and keep it as straight as possible.

The LED wall washer should be kept vertical or horizontal during the installation process.

When LED wall washer meets the corner during the installation process, the LED wall washer must be kept facing up and the back facing down, maintaining a certain bending arc, $\Phi \geq 150\text{mm}$.

Wrong operation

Do not twist the LED wall washer during the installation process.

Do not fold the LED wall washer in half or bend it at a small angle during the installation.

When the LED wall washer meets the corner during the installation process, the LED wall washer must be kept facing up and the back down, and it cannot be bent at right angles.

Wrong operation

Step
01

Use scissors to cut from the connection of two PCBs, as shown in Figure 1

Figure 1

Step
03

Butt-weld the power line and the light strip, pay attention to the positive and negative poles, and insulate the positive and negative poles, as shown in Figure 4:

Figure 4

Step
02

Fill the end cap with glue, and insert the light strip into the end cap. After installation, as shown in Figure 2:

Figure 2

Step
04

Insert the end cap into the wire, repeat the gluing procedure in Figure 2, and then insert the light strip into the end cap, as shown in Figure 5:

Figure 5
