

PLOSH

Features:

PLOSH Waterproof Recessed Downlight, constructed with a durable die-cast aluminum body and 5mm Tempered Glass Diffuser.

Tempered glass is stronger than regular glass because it undergoes a special heat-treatment process that increases its strength. This process makes it more resistant to impacts, temperature changes, and pressure.

The diffuser ensures that light is spread uniformly across the area, reducing hot spots and glare. This is particularly important in spaces where consistent lighting is essential for visibility

Transparent glass cover with a rubber seal ensures excellent water and dust protection, offering high light transmittance.

Silver reflector provides different options of beam angles, ensuring uniform light distribution. Designed for easy recessed installation, with high light transmissivity for optimal brightness.

Homogenous, well-balanced light dispersing, no shadow.
